Lock Hydro 10 Partners; Notice of Preliminary Permit Application Accepted for Filing and Soliciting Comments, Motions to Intervene, and Competing Applications

On April 28, 2023, Lock Hydro 10 Partners filed an application for a preliminary permit, pursuant to section 4(f) of the Federal Power Act (FPA), proposing to study the feasibility of a hydropower project located on the Kentucky River, in Clark and Madison Counties, Kentucky. The sole purpose of a preliminary permit, if issued, is to grant the permit holder priority to file a license application during the permit term. A preliminary permit does not authorize the permit holder to perform any land-disturbing activities or otherwise enter upon lands or waters owned by others without the owners' express permission.

The proposed Boonesborough Hydroelectric Project would consist of the following: (1) an existing 250-foot-long, 35-foot-high concrete lock and dam; (2) an existing 26.4-mile-long, 596-acre reservoir having a total capacity of 5,960-acre-feet; (3) a proposed 28-foot-wide, 52-foot-long, 49-foot-high powerhouse built into the abandoned lock containing six Voith StreamDiver submersible turbine/generating units for a total installed capacity of 3.012 megawatts; (4) a proposed 20-foot-wide, 42-foot-long control building on the adjacent shore; and (5) a proposed 800-foot-long, 14.0 kilovolt transmission line. The project is estimated to generate an average of 14,000 megawatt-hours annually. The existing lock and dam are owned by the Kentucky River Authority.
